

## BUSINESS OPPORTUNITY FACT SHEET

JUST ROOIBOS is a family run business since 1999, and exports Rooibos tea (sometimes known as 'Red Bush') from South Africa to international markets. The Rooibos products that we export are made from Rooibos grown by family farmers in South Africa.

No fertilizers or toxic chemicals are used in the production, cleaning, or storage of our products and all exported Rooibos is independently tested by the PPECB (South Africa's Official Perishable Produce Export Certification Agency). Our producer and packaging unit is certified by, and registered with, both NOP and JAS. Compliance with the UN's food safety requirements includes registration with HACCP systems and GAP procedures, guaranteeing you high quality, environmentally friendly products. All of our boxes are sustainably made of recycled cardboard, and our teabags are made from oxygen bleached paper.

### STANDARD JUST ROOIBOS

We can export Rooibos tea in the box design of your choice. This orange box is a sample of our standard box design and size. Each box contains 100 grams of tea in 40 teabags, sealed in 2 foil pouches. For shipment purposes, 48 boxes of Rooibos tea are packed into larger cardboard boxes.

## THE BIG FIVE

We also export Big Five Organic Tea. There are 5 flavours which are packaged in 50 gram corrugated outer cartons. Each pack contains 20 teabags. These flavours include: Organic Rooibos Tea, Organic Chai Rooibos Tea, Organic Vanilla Rooibos Tea, Organic Rooibos & Honeybush Tea, and Organic Green Rooibos Tea.

These Big Five 50 gram boxes can be provided in a pack of five, or alternatively can be exported individually. For shipment purposes, we place 20 x 5 packs in a cardboard box, or simply 100 packs in a cardboard box.
